KITCHENS

**Robust Fitted
Kitchens**

Our durability comes from our robust carcass:

Our wooden kitchen range features the robust **TITAN** carcass, assembled via a screwless tongue and groove system that has been tested and certified to FIRA Gold Level H for heavy use. This joint connection is stronger than a traditional assembly system as it interlocks along its entire length.

Available in a wide choice of door styles and colours.

"New College took a view some time ago that given kitchen units in student areas were likely to be heavily used, the selection of units that are robust would be a logical and sensible step forward. After some debate it was agreed that Steelplan Kitchens units would be ideal. Maintenance on these units has been very low."

DEREK FINLAY, CLERK OF WORKS
